ABOUT ME

Seasoned Software Engineer with over 4 years of professional experience in crafting innovative digital solutions. Skilled in JavaScript / Typescript programming languages and software architecture, I excel at creating user-centric applications that merge cutting-edge technology with seamless functionality.

Passionate problem solver with a knack for turning complex challenges into elegant code. I am excited to join your team and contribute my skills and experience to drive success.

WORK EXPERIENCE

Software Engineer - Team Lead
Ecobank Nigeria, Lagos / Lagos / Jan 2023 - Oct 2023

1. Leading a team of 4 in developing a fintech application (Rapid Transfer) using TypeScript and React Native.
2. Delegating tasks to team members and ensuring efficient project execution.
3. Managing task allocation using Jira and organizing work, including initial app setup.
4. Developing flowcharts, layouts, and documentation to identify project requirements and solutions.
5. Writing well-designed, testable code and ensuring the integration of software components.
6. Communicating project goals to team members and reporting progress to project supervisors.
7. Developing software verification plans and quality assurance procedures.
8. Mentoring team members, identifying areas for improvement, and nurturing their skill sets.
9. Troubleshooting, debugging, and upgrading existing systems.
10. Deploying programs and evaluating user feedback.
11. Documenting and maintaining software functionality.

Associate Software Engineer
African Fintech Foundry / Lagos / May 2022 - Dec 2022

Produce specifications and determine operational feasibility
1. Develop flowcharts, layouts and documentation to identify requirements and solutions
2. Develop software verification plans and quality assurance procedures
3. Execute full software development life cycle (SDLC)
4. Integrate software components into a fully functional software system
5. Write well-designed, testable code
6. Comply with project plans and industry standards
7. Troubleshoot, debug and upgrade existing systems
8. Deploy programs and evaluate user feedback
9. Document and maintain software functionality
