PROFILE SUMMARY

Detail-oriented, enthusiastic Full stack developer, talented and results-driven **Software Engineer** with expertise in **Web Development** and **Mobile Engineering**. Proficient in **React.js**, **React Native**, **HTML**, **CSS**, **JavaScript**, and **SQL**. Experienced with a strong typescript background, Love for design, experience in working with remote companies and a passion to innovate and grow. Strong problem-solving abilities, with a focus on automation, continuous improvement, and teamwork. Additionally, brings valuable **customer service** experience, demonstrating strong communication and leadership skills. Passionate about creating innovative solutions to drive business success.

HARD SKILLS

Mobile Development
Basic Web Design
Front- End Development
Backend Services
Databases
Optimization
Clean Code
Hyperlinks
Display and Create Image Maps
Best Practices
Cascading Style Sheets (CSS3) Tailwind
Rollover Buttons
Page Layout
Absolute & Relative Positioning
Debugging

SOFT SKILLS

Analytical & Critical Thinking
Impeccable Work Ethic
Time Management
Strategic Planning
Code Reviews
Problem-Solving
Communication
Deadline-Driven
Detail-Oriented
Collaborative
Conscientious
Peer Programming
Architecture Reviews
Jira
Rspack

TECHNICAL SKILLS

Next Js
Javascript
Microsoft Teams
Typescript
React Js
Vite
Slack
HTML
CSS
SQL
Command Line
GitHub
Context API
Zustand

EDUCATION & TRAINING

Web & Software Development Programme | ITonlinelearning Ltd.

2024

- HTML
- CSS
- Python
- Microsoft Azure Certificate
- AWS Certified Cloud Practitioner
- Command Line
- GitHub

Software Engineering | Institute of Decagon Training Nigeria

2022

B.Sc Computer Science | Institute National Open University

2014-2019

B.Ed Chemistry Education | Cross River University

2013-2018

Agile Training | Scrum Study Certificate | Scrum study

2022

DESIGN PORTFOLIO

- Embedded documents within the HTML documents by using Iframe tags to specify inline frames whilst creating and adding links, images, and other media to the website
- Utilised HTML to develop the website content including a landing page with three additional pages namely contact, about, and FAQ
- Created, edited, and manipulated web typography as well as created and embedded link lists and tables into pages
- Maintained site formats and structural integrity by defining elements and content using the CSS3 box model
- Kept site load times to a minimum by effectively implementing CSS3 syntax to style website pages

Thank you for your
consideration.

- Developed a personalised website as part of the web development programme final assignment
- Utilised multiple style attributes to set the style of HTML elements and therefore style webpages
- Explored various website hosts taking into consideration type, security, features, and pricing
- Determined the theme of the website in order to be eye-catching and user friendly
- Used CSS3 Dynamic Properties using transformations, transitions, and animations
- Created HTML web pages using HTML Editors Visual Studio and Brackets
- Selected a subdomain in order to obtain the domain URL.

WORK EXPERIENCE

D'roid Technologies Ltd | Lead Software Engineer

2023-current

- Spearheaded the development of scalable React.js applications, leveraging modular component libraries to optimize flexibility, reusability, and long-term maintainability.
- Engineered and optimized backend processes, achieving a 30% reduction in development time and streamlining the development process.
- Directed the seamless migration of applications to the latest React version, ensuring enhanced maintainability, improved performance, and future-proofing of the codebase.

Senior Software Engineer | E- Process

2023-2023

- Led the deployment of scalable fintech solutions, prioritizing performance optimization and robust security features to meet industry standards.
- Streamlined development workflows, improving team efficiency and ensuring timely delivery of high-quality software.
- Drove continuous improvement by implementing feedback-driven enhancements, significantly elevating user experience and satisfaction.
- Strengthened leadership and collaboration skills by actively contributing to a high-performing development team.
