PROFILE SUMMARY

Senior Software Engineer with 6+ years of experience building high-performance, cross-platform web and mobile applications using React.js, React Native, and modern TypeScript architectures. Adept at designing scalable frontend architectures, responsive user interfaces, and complex state management workflows (Redux, Context API). Proven track record of delivering clean, maintainable, and production-ready software solutions within multidisciplinary teams, supporting projects in Artificial Intelligence, Interactive Platforms, and Enterprise Web & Mobile Applications. Collaborative and proactive professional with a deep understanding of AGILE methodologies, capable of independently owning features from initial UI/UX concept to deployment across Web, iOS, and Android platforms.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript
- **Frontend:** React.js, React Native, Redux
- **Backend & Services:** Firebase, REST APIs
- **Styling:** Tailwind CSS, Vanilla CSS3, Material UI
- **Databases:** SQL, Firebase
- **Tools & DevOps:** Git, GitHub, Jira, CI/CD

Education

B.Sc Computer Science — National Open University (2014–2019)

B.Ed Chemistry Education — Cross River University (2013–2018)

Certifications

- AWS Certified Cloud Practitioner
- Microsoft Azure Certification
- Scrum Study Agile Certification

Professional Experience

Senior Software Engineer (Team Lead – Web/Mobile) D'roid Technologies | 2023 – Present

- Led development of scalable web and mobile engineering solutions using React JS and React Native (TypeScript), driving the end-to-end lifecycle of high-performing front-end applications from initial requirements gathering through to live production support.
- Built and maintained modular component libraries and state management workflows using React, Redux Toolkit, and Tailwind CSS, improving render performance, optimizing bundle sizes, and ensuring strict type safety and accessible design across sensitive user-facing features.
- Supported performance monitoring, error tracking, and application optimization, leveraging tools like React DevTools, Lighthouse, and crash analytics to maintain reliable, low-latency cross-platform user experiences.
- Collaborated with cross-functional product and backend teams to integrate RESTful APIs and WebSockets, delivering seamless data-driven interfaces and supporting broader engineering priorities across both web and native platforms.

Senior Software Engineer E-Process (Ecobank) | 2021 – 2023

- Engineered high-performance web dashboards and mobile applications using React JS and React Native, serving large-scale enterprise users and streamlining financial decision-making across business teams.

- Transformed legacy interfaces into highly responsive, app-like experiences, significantly boosting user engagement, decreasing task completion time, and driving platform adoption across desktop and mobile.
- Integrated real-time REST and WebSocket APIs into front-end architectures, ensuring low-latency data synchronization, offline capability, and state consistency across distributed financial applications.
- Optimized cross-platform performance and component reusability, leveraging custom React hooks, efficient state management, and native performance tuning to deliver smooth, high-throughput user interfaces.

Mobile Engineer (React Native) Coaster Technologies | 2021

- Developed and maintained cross-platform mobile applications using React Native, delivering consistent user experiences across iOS and Android and improving overall user engagement.

Frontend Engineer G&T Limited | 2020 – 2021

- Developed and maintained responsive web apps, focusing on React, delivering scalable code and efficient performance across internal web apps and dashboards, improving overall system reliability and usability.

Frontend Engineer (React js) Harney Project Limited | 2018 – 2019

- Transformed complex web dashboards into clean, intuitive, app-like user experiences, improving usability, adoption, and overall workflow efficiency.

Projects (Key Differentiator)

ToolBox Mobile App | React Native, Redux, Firebase View on [Google Play Store](#)

- Engineered a high-performance productivity application using React Native and Redux, implementing a modular architecture that reduced feature deployment time by 25%.
- Optimized rendering cycles and asset loading, achieving a 40% reduction in app load time and significantly increasing user retention metrics during the initial launch phase.
- Scaled the application to support 100+ active users within the first month by implementing a robust Firebase backend for real-time data synchronization and persistent storage.
- Developed a library of reusable UI components, ensuring design consistency and facilitating rapid scaling for future feature expansions.

D'roid One Mobile App | React Native, Firebase, Redux View on [Google Play Store](#)

- Designed a service-delivery mobile platform that streamlined the connection between users and technical service providers, reducing booking friction by 30%.
- Integrated complex RESTful APIs to manage real-time service discovery, ensuring low-latency data delivery and high application responsiveness across diverse network conditions.
- Refined the user journey by implementing user-centric UI/UX principles, which led to a measurable increase in session duration and user engagement.
- Leveraged Tailwind CSS and NativeWind to build a responsive, cross-platform interface that maintained visual integrity across both iOS and Android devices.

Personal Portfolio Website | React.js, TypeScript, Redux View [Website](#)

- Developed a professional portfolio using Next.js and TypeScript to demonstrate expertise in Server-Side Rendering (SSR) and type-safe frontend development.
- Deployed and managed the site using AWS, utilizing S3 and CloudFront to ensure global availability and optimized content delivery.
- Implemented fully responsive design patterns and modern accessibility standards (WCAG), showcasing a commitment to inclusive and performant web development.
